

Installation procedure for the IPACO software

May 2018

Downloading the installer:

- Link: <http://ipaco.fr/IPACO-Setup.exe>

Installing (from the downloaded file **IPACO-Setup.exe**):

- Start execution of the file **IPACO-Setup.exe**
(ignoring possible warnings from Windows)
- *Welcome to the IPACO Setup Wizard* **Next**
- Accept the agreement **Next**
- Choose a folder (disk with 1 GB free) **Next**
- Untick *Sample Data* if you do not want test data **Next**
- Choose a folder for data
(If the chosen folder is not the one proposed by default,
click on *Create a new folder*, then on *OK*) **Next**
- Choose a shortcut name (for start) **Next**
- Tick *Create a desktop icon* (if you wish) **Next**
- (*Résumé*) **Install**
(Wait a few minutes)
- Click on *finish*

Setting-up a licence:

- Start execution of **IPACO**
- A window indicates your HostName and HostID, while asking for a license key
- Note down your HostName and HostID, then pass them on to FL in the [Hostname declaration](#) for your PC (copy/paste)
(.....)
- Introduce the licence key provided in return by *FL*
(Take care not to introduce a space while doing copy/paste)
- Click on *OK*
- Quit IPACO (which can be restarted straight after)

Uninstalling:

- Click successively on *Start / (All programmes) / IPACO*
- Start execution of the file **Uninstall IPACO**
- Click successively on **yes / OK**
